

Phlebotomists

Please find below a list of phlebotomists known to Biolab who are able to provide phlebotomy services in the UK and Ireland. Please arrange your phlebotomy visit and payment for the service directly with the selected phlebotomist. Some will be able to return your samples to Biolab for a small charge or you may need to make your own arrangements (we recommend Royal Mail Special Delivery for next working day delivery – please note that we advise against posting samples on a Friday as our laboratory is closed at weekends).

We recommend these phlebotomists for the convenience of patients, but encourage you to seek full details in advance of the visit (i.e. fees, qualifications & experience and insurance).

We hope this service is of help to you. Please follow supplied instructions with Biolab test kits and don't hesitate to contact us if you have any questions about the test kit requirements.

Although we take every care to only recommend phlebotomy services known to Biolab and in whom we have full confidence, Biolab cannot accept any responsibility for the service provided by these suppliers.

Nationwide

Ashlee Health Care (UK and Ireland)
